ABOUT ME

Highly motivated and results-driven Software Engineering Student with a strong focus on Front-End Development using modern frameworks. Proficient in building cross-platform mobile applications with Flutter and dynamic web interfaces with React. Eager to leverage foundational knowledge in software development, data structures, and algorithms to contribute to challenging projects.

EXPERIENCE

Hyper Net Company

Checks Department (Wifi Outdoor) & Installation Technician

- Worked in the checks department for Wifi Outdoor services.
- Performed installation and maintenance of Wifi Outdoor systems.

Minicodeleader Platform

Programming Languages and Frameworks Instructor

- Instructing students in various programming languages and frameworks including React and Flutter.

Online English School

English Language Instructor

- Teaching English language to students through an online platform.

Klibbadr School

English Teacher

- Taught English language to students, developing strong communication and organizational skills.

Abnaa Algolan Team

Volunteer

- Contributed to community initiatives, demonstrating teamwork, leadership, and commitment.

PROJECTS

E-commerce Application

Developed a full-featured e-commerce platform, focusing on a seamless user experience and robust data handling.

Automated System for Arabian Academy Institute

Created a comprehensive automated system designed to streamline administrative and educational processes for the institute.

KitchenX

React, TypeScript, Tailwind, Laravel Echo

A platform that connects home chefs with people who want their food, and an operations desk that covers the day from the meal to the driver to the settlement.

- Sign-in, chefs, categories, meals, orders, drivers, customers, coupons, settlements, and reports.
- Realtime notifications, and an Arabic and English interface with forms checked before submit.

Information Retrieval System

Python, FastAPI, Streamlit, SBERT, FAISS

A full search pipeline in a service architecture: index, rank, evaluate, then answer from the documents. Built for CORD-19 and MS MARCO.

- TF-IDF, BM25, and Sentence-BERT, fused with reciprocal rank fusion.
- Multi-signal reranking, measured with MAP, nDCG, and precision, plus query refinement and multilingual search.

Advanced Banking System

React, Laravel, PHP

Accounts, movements, and approvals. The interface is React, the server is Laravel, with reports and a path back in when the password is lost.

- Accounts, transactions, scheduled transfers, users, approvals, and reports.
- Support tickets, sign-in, and password reset. Separate repositories for the interface and the server.

Compiler Front End

Java, ANTLR

A Java compiler front end for an Angular-shaped grammar: lexing, parsing, an abstract tree, a symbol table, then a pass that surfaces semantic errors.

- Lexer and parser generated with ANTLR, an AST, a symbol table, and a visitor for semantic checks.
- Runs on test files and prints the errors.

Python Adventure

React, Tailwind, Framer Motion

An interactive door into Python from zero. The first mission asks for the line that makes the computer say hello, then sessions continue with a progress trail.

Complaints System

React, Laravel, PHP

A complaint path between administration, agency, and employee: type, department, attachment, and a history of what changed.

- Desks for administration and the agency, plus employee sign-in.
- Complaint types, departments, attachments, and a handling history for each step.

Integrated Python Curriculum

HTML, CSS, JavaScript, Arabic UI

An Arabic curriculum site for technical institutes, moving from zero toward practice: four levels, a lesson index, and room for exercises and applied projects.

HyperWifi

HTML, CSS, JavaScript, WhatsApp

An Arabic landing page for an internet subscription: place, floors, and speed package, then the request leaves as a formatted WhatsApp message.

EDUCATION

Damascus University

Bachelor in Software Engineering

Current Student

Spoken languages

Arabic and English

SKILLS

FRONT-END

React

Flutter

Dart

JavaScript

TypeScript

HTML

CSS

Tailwind

BACK-END

Laravel

PHP

Python

FastAPI

LANGUAGES

Java

C++

Dart

JavaScript

DATABASE

MySQL

SQLite
