PROFILE

Software engineer and a graduate of Damascus University. Builds complete web products: Arabic interfaces, Laravel and FastAPI servers, and an information-retrieval system that measures ranking quality.

SELECTED WORK

KitchenX • 2026

Home-chef platform: meals, orders, drivers, coupons, settlements, reports, realtime notices. React, TypeScript.

Information Retrieval • 2026

BM25, TF-IDF, Sentence-BERT, rank fusion, MAP and nDCG, answers grounded in retrieved documents. FastAPI, Streamlit.

Python Curriculum • 2026

Arabic four-level curriculum for technical institutes, from language basics toward broader topics.

Python Adventure • 2026

Interactive first steps in Python: short missions, sessions, and a progress trail. React.

Banking System • 2025

Accounts, transactions, scheduled transfers, approvals, reports, support tickets. React and Laravel.

Complaints System • 2025

Admin, agency, and employee flow with types, departments, attachments, and a handling history.

Compiler Front End • 2025

Java and ANTLR: lexer, parser, abstract syntax tree, symbol table, semantic checks.

HyperWifi • 2026

Arabic landing page that collects an internet subscription and hands it to WhatsApp.

SKILLS

React, TypeScript, JavaScript, Tailwind, PHP, Laravel, Python, FastAPI, BM25, Sentence-BERT, SQLite, Java, ANTLR, Git.

EDUCATION

Damascus University - Software Engineering
